Features

- Economical, efficient method of shipping or storing circuit boards and other static sensitive electronic devices
- BLACK low density conductive convoluted polyurethane foam, < 1 x 10^5 ohms laminated to the top and fitted in the bottom
- BLACK low density conductive convoluted foam is permanently conductive; will not lose electrical properties or fade
- Provides ESD shielding with lid closed, “Faraday cage” effect restricts electrostatic charges and discharges to exterior
- Corrugated material is constructed from a unique buried conductive layer of impregnated corrugated fiberboard with a static dissipative surface
- BLACK convoluted foam minimizes movement and reduces stress from physical shock
- Corrugated material is made from 100% recycled material and is 100% recyclable
- No assembly required
