

Radiant Light Films

Colour Mirror Films for Labelling Applications

“The only limit is your imagination” – a phrase often heard, but in the case of Radiant Colour Mirror Films, it has never been more true. Versatility is the key-word here – Radiant Colour Mirror Film can be used to produce dazzling self-adhesive labels to help enhance, identify or protect your product. A number of self adhesive label materials are available, either to use as a printable film or

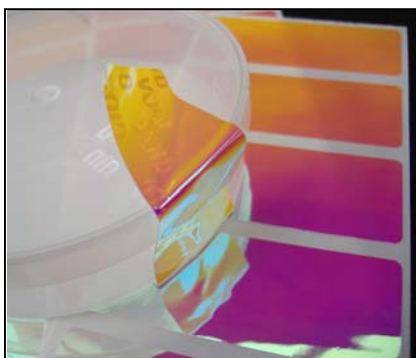

an over-laminating film over pre-printed labels.

Although only two film derivatives are available, by laminating them to different coloured backgrounds, an almost endless range of colour shift patterns are available.

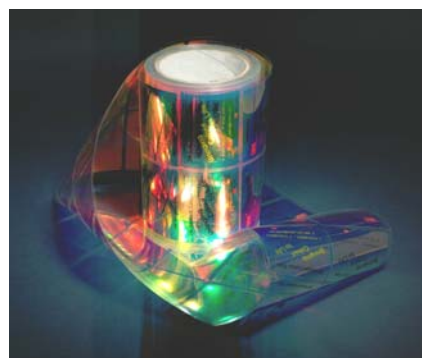

Now, just add your own imagination ...

Cosmetics & Toiletries:
3M™ Radiant Colour Mirror Films provide a dazzling array of colour to enhance and bring to life any product packaging. When laminated to a white or coloured background, Radiant Colour Mirror Film offers an almost endless array of colour options.

Security Labels:
By combining Radiant Colour Mirror Film with security label materials, the label not only gives evidence of tampering, but also can be used as part of the product's brand identity.

Product Labels:
Radiant Colour Mirror Films, in a self-adhesive label material format offer a unique labelling material, which could help sell your product off the shelf, purely on visual impact.
